In today's competitive global market, your business needs technology that enables flexibility and cost-effectively adds value to your organization. Many companies are striving to streamline communications while also providing high availability, comprehensive security and simplified IT management. Internet-based hosted services provide a way to meet these objectives.

InterCall has partnered with Microsoft® to offer the Business Productivity Online Suite, or BPOS, a set of Microsoft hosted messaging and collaboration services designed to address the changing needs of today's businesses. BPOS includes:

Exchange Online – Provide employees access to email, calendar and contacts from virtually anywhere, at anytime.

SharePoint Online – Share documents, contacts, calendars and tasks in a single location; efficiently collaborate, find organization resources and manage content and workflow.

Office Live Meeting – Connect with colleagues and customers through real-time meetings, training sessions and events through hosted conferencing services.

Office Communications Online – Enable users to find and rapidly connect with the right person from the application they use most with rich presence and instant messaging capabilities.

Boost Your Productivity with InterCall and BPOS

As the largest conferencing provider in the world, InterCall offers a global sales and support team, along with professional services to help you successfully drive the rollout and adoption of conferencing and collaborative solutions on an enterprise-wide scale. And to ensure a smooth implementation process, we have partnered with industry-leading experts who can provide guidance and direction at every step of the way.

Deployment services can include solutions consultation, strategic training programs and end-of-project reports and analysis, and every InterCall project is overseen by our dedicated consultants. Our consultants have the expertise to assist with Exchange on Premise to Hosted Exchange migrations, as well as more complex and time consuming non-Exchange email platforms to Hosted Exchange migrations and deployments.

Get Started Today!

BPOS delivers feature-rich productivity tools to users while helping to relieve the burden of managing and maintaining business systems—freeing up your IT departments to focus on initiatives that can deliver true competitive advantages. Your business benefits from always up-to-date technologies that are deployed rapidly, maximizing your valuable IT resources and reducing your need for infrastructure investments.
