

OVERVIEW

# Mobile Assistant

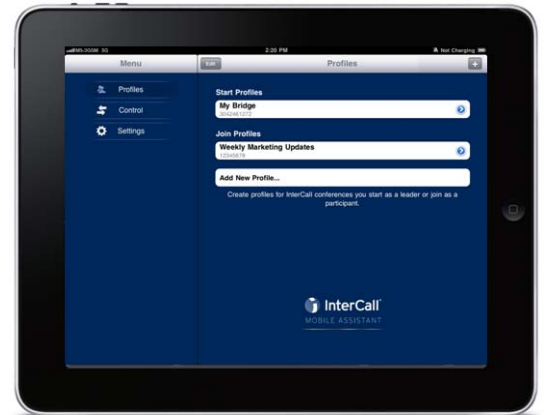

Connecting on the Go with iPhone and iPad

Want a simpler way to connect to meetings when you're on the go? Or do you need an easier way to organize the dial-in numbers and conference codes for several different meetings? Now Mobile Assistant, a free application from InterCall, gives you one-touch dialing into your conferences from your iPhone or iPad.

It's a situation most of us have experienced—you need to attend a meeting when you are unable to be in a traditional 'office' setting. Whether you're heading to another meeting, have no access to a landline phone or are called out of the office unexpectedly, you need to join the meeting and need do it while you're on the road. InterCall's latest innovation allows you to access a conference call with the tap of the screen on your iPhone or iPad.

**Are you ready to make joining your on-the-go meetings easier?** Download Mobile Assistant directly from the Apple App Store (Available in English, French, German and Spanish).

## WHAT CAN YOU DO?

- **Store hundreds of audio conference details**—from weekly, recurring meetings to one time calls you need to attend while mobile.
- **Start and join InterCall audio conferences** with the tap of the screen. You no longer need to enter your ten-digit dial-in number, conference and leader PIN.
- **Join audio conferences** via dial-out or dial-in as a participant or a leader. You indicate the details when creating your profiles.
- **Accept an automatic prompt to dial into the conference** when your data connection is detected as unreliable for dial-out.
- **Dial out to contacts** stored in your address books to quickly join them to your call.
- **Have conference controls available** to you directly on your iPhone or iPad.
