High-profile meeting events demand high-quality presentation. With geographically dispersed audiences, schedules that are nearly impossible to sync, and ever-increasing costs of travel, how do you engage your audience in a visually dynamic presentation and provides face-to-face results? InterCall's on-site video production services have a powerful impact on your audience through the use of videoconferencing, internet broadcasting and satellite communications.

## Use On-Site Video Production to:

- + Reach participants on a global scale using worldwide meeting rooms and studio facilities
- + Use satellite services that facilitate carrying your message around the world.
- + Utilize interactive meeting tools and robust multimedia capabilities to engage participants as though they are right in your meeting space.
- + With equipment and personnel, we'll capture the multicam views to give you a

InterCall has strategic partnerships with some of the leaders in on-site video production technologies and videoconferencing manufacturers. Our focus is to synthesize your content with the most technologically advanced methods of visual communications and reach your audiences in the room and around the world. You provide the meeting event, we'll provide the rest.
