Virtual Show is a flexible communications and demand generation solution that provides a virtual venue for events such as trade shows, partner pavilions, conferences and training summits. With its professional networking capabilities, ON24 Virtual Show makes virtual events more engaging and interactive.

Below you will find a brief explanation of the experience attendees have when participating in a virtual show and the systems requirements.

SHOW LOBBY

After logging in, attendees enter the show lobby where a video greeting will welcome them. On screen hotspots provide entry to the Auditorium, Exhibit Hall, Resource Center and Communications Lounge. Consistent navigation at the bottom of the screen provides additional functionality and shortcuts.

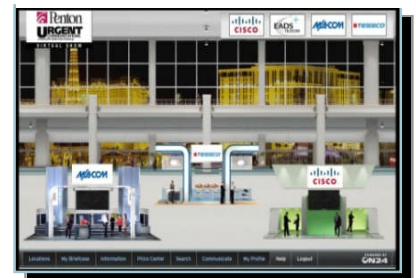

AUDITORIUM

Attendees can visit the Auditorium to attend live and on demand webcast presentations and keynotes. Attendees can add reminders to their Outlook® Calendars, save presentations in their Briefcase and participate in live Q&A.

EXHIBIT HALL

The Exhibit Hall gives attendees the ability to browse exhibitor booths, engage in a discussion with a booth representative and collect information from sponsors. An exhibitor directory makes it easy to locate specific booths all with a click of their mouse.

COMMUNICATIONS LOUNGE

The Communications Center offers networking features including scheduled discussions, message boards and chat. These tools help attendees to build their profiles and find others to add to their network.

SYSTEM REQUIREMENTS FOR ATTENDEES:

- + Operating system: Windows XP, Windows Vista, Mac OS X, Ubuntu Linux
