

INTERCALL®

PRESENT ONLINE®

What if you could work on a document along with your partner in Pasadena? Or, share your vision simultaneously with investors located at the four corners of the globe? Present Online can make it happen! InterCall's web-based presentation tool brings the power of visuals, real-time collaborative application sharing and much more to your audio conference. The results – a completely integrated conference communication package.

▶ HERE ARE A FEW WAYS TO USE PRESENT ONLINE

- **Launch new products** to your sales force without taking them out of the field.
- **Conduct virtual sales presentations** for your customers and prospects.
- **Enhance training sessions** and increase remote audience participation.
- **Provide financial updates** to your management team.

▶ PRESENT ONLINE FEATURES

Training Become a Present Online expert with the help of our training team. Training sessions are customized to match your level of experience and require a minimal time commitment.

Technical Support Contact our technical experts at 800-291-4047 for answers to any questions you might have – anytime, day or night.

Application Sharing Show your audience an application running on your desktop or pass control of it to a participant for true collaborative interaction.

Record & Playback Record the audio portion of your conference using your PC's for synchronized playback with your presentation.

Polling Ask questions or test the knowledge of your participants and get immediate feedback. Polls can be preplanned and saved or created on the spot during your presentation.

Web Touring Take your participants for a virtual ride complete with Flash animation: they surf along with your browser and see what you see.

Co-Leader Pass control of the visuals, applications and web tours for presentations requiring more than one leader.

Enhanced Reporting A post-meeting record of participants, polling results and chat messages.

Question & Answer Give your audience the chance to ask questions and get immediate answers. You'll have a better understanding of what your audience is thinking and helps manage large audiences.

Chat Instantaneous communication about the subject at hand. Use this feature as a "parking lot" for side issues.

Participant List See a list of who is in attendance and control their access to your presentation.

Participant Search Quickly find a participant during your meeting to promote to Co-Leader, dismiss, etc. It is especially helpful for large audiences.

Presentation Uploads Upload presentation slides before your meeting or on-the-fly during your meeting.

Document Archive Create a library of presentations for those who missed it 'live'.

Whiteboard Interact in a freeform atmosphere to capture the moment.
